### About

As an avid gamer, I was introduced to the concept of programming through games that taught you how to code. Having worked for many years in my family's restaurant and as a pharmacy tech, I knew when I found programming it was the intellectual spark I had been looking for longterm. My experiences in and out of the workplace has afforded me the luxury of learning from many different experts in both business and life. I have finally found a career path, as a full-stack software developer, where I will be challenged, constantly learning, and one that will afford me the opportunity to be a part of a forward-thinking organization enabling me to continue to expand my skills as a developer.

### Experience

#### Nashville Software School | Junior Software Developer

2018

Focused on full stack development fundamentals and problem solving in a simulated company environment with SCRUM and AGILE methodology. Experienced hands on application of Object-Oriented Programming fundamentals and solid principles through group and individual projects reflecting real world business problems with Python. Practiced source code version control with Git/GitHub as well as project & issue tracking. Learned JavaScript fundamentals leveraging DRY, modular, readable code and reusable components. Built single-page applications with HTML, CSS, and JavaScript libraries like jQuery & React and practiced Test Driven Development with PyUnit. Used application design through white boarding dependencies and building ERDs. I created and modified database design/content using SQLite, PostgreSQL, SQL as well as RESTful APIs with Django REST framework.

#### Project

##### • Ghibli Chronicles:

Ghibli Chronicles is a build your own text-based adventure game featuring lovable characters from a celebrated Japanese movie studio. I strived to create something where the players would be able to chose their own path through the games story and have a unique experience every-time. This project uses HTML, CSS, React, Heroku, and AWS.

### Other Experience

#### CVS / Vanderbilt | Pharmacy Technician

March 2015 - 2017

Worked directly with customers, physicians, and insurance companies to fill prescriptions while adhering to state and federal regulations. Responsible for scheduling staff, some aspects of inventory management, and maintaining an orderly, sterile work environment for compounding and preparing medications. EPIC trained and Pharmacy Technician Certification Board recognized.

#### Act Like A GRRRL | Student Ambassador

2011

Represented Act Like A GRRRL in workshops and through stage performances to help women feel comfortable with themselves and discover their self-identification. Topics often included healthcare and feminism.

### Education

#### Nashville Software School | Full-Stack Software Development Certificate

2018

#### Big Picture High School | High School Diploma

2011
