About Me

As a Nashville native, I have seen the city grow and change; but as always, I'll be a Nashvillian at heart. Between my first 6 years living in Italy and the following 17 spent in and out of the fine dining Italian restaurant my family owns, I've honed the language translation skills for both English and Italian. As an avid gamer who is familiar with a computer I armed myself with my choices and fell in love with programming. My experiences in and out of the workplace has afforded me the luxury of learning from many different experts in both business and life. I look forward to finding a cultural fit with a forward-thinking company that will afford me the opportunities I require to further my skills in software engineering.

Objective

To obtain a position within a growing company that will best utilize my experience and skills to further both company and personal interests.
