About

My first 6 years were spent living in Italy and the following 17 years were spent in and out of the fine dining Italian restaurant my family owned in Nashville. I've honed my language skills in both English and Italian and my experiences in and out of the workplace has afforded me the luxury of learning from many different experts in both business and life. Because of this I was able to discover the joys and frustrations of programming. Having spent some time learning full stack development, I now look forward to finding a cultural fit with a forward-thinking company that will afford me the opportunities I require to further my basic skills in software engineering.

Education

Web Software Developer Certificate | **Nashville Software School | 2018**
High School Diploma | **Big Picture High school | 2011**

Skills & Abilities

Fluent in Italian and English
Highly organized
Pharmacy Technician Certification Board recognized
Enjoys teamwork environment to showcase effective leadership skills
Highly efficient in problem solving
Strong interpersonal skills with colleagues, management, and clients
Overseas travel including Europe and South America

Experience

Junior Software Developer   **Nashville Software School | 2018**
Focused on full stack development fundamentals and problem solving in a simulated company environment with SCRUM and AGILE methodology. Experienced hands on application of Object-Oriented Programming fundamentals and solid principles through group and individual projects reflecting real world business problems with Python. Practiced source code version control with Git/GitHub as well as project & issue tracking. Learned JavaScript fundamentals leveraging DRY, modular, readable code and reusable components. Built single-page applications with HTML, CSS, and JavaScript libraries like jQuery & React and practiced Test Driven Development with PyUnit. Used application design through white boarding dependencies and building ERDs. I created and modified database design/content using SQLite, PostgreSQL, SQL as well as RESTful APIs with Django REST framework.

Pharmacy Technician   **CVS / Vanderbilt | March 2015 - 2017**
Responsible for filling prescriptions for clients complying with federal and state regulations while maintaining high customer service levels. Also responsible for working with third parties such as physicians and insurance companies to ensure timely service. I also acted as part of the team leadership by performing administrative duties including but not limited to staff schedules. Also responsible for parts of inventory management. Maintained an orderly, sterile work environment for compounding and preparing medications.

Student Ambassador   **Act Like A GRRRL | 2011**
Held workshops and performed in a theatre with an audience of over 3,000 within an organization which strives to help women feel comfortable with themselves and discover their self-identification, covering such topics as healthcare and feminism.

Projects

Ghibli Chronicles:
Ghibli Chronicles is a build your own text-based adventure game featuring lovable characters from a celebrated Japanese movie studio. I strived to create something where the players would be able to chose their own path through the games story and have a unique experience every-time. This project uses HTML, CSS, React, Heroku, and AWS.
